NUMARİNE MARINE INDUSTRIES INC., our company engaged in yacht production and manufacturing, commits to continuously improving the effectiveness of our Environmental Management System, measuring, monitoring, and enhancing our environmental performance with the aim of minimizing the environmental impact of our activities, products, and services, using natural resources efficiently, and developing a sustainable production culture.

We attach importance to complying with the legal and other requirements we are obliged to comply with in the field of the environment. We are committed to this decision by implementing the items listed below in our efforts to protect the environment and prevent pollution:

- Including environmental performance targets for senior management and all employees;
- Controlling the environmental impact of all materials used in yacht production, such as chemicals, paints and solvents, resins, and composite materials;
- Implementing technologies and best practices that minimize air emissions, noise, and wastewater discharges;
- Reduce waste generation at source; prioritize recycling and reuse,
- Ensure the efficient, effective, and sustainable use of all resources, primarily electricity, water, fuel, and raw materials,
- Support environmentally friendly materials and energy-efficient methods in boat production processes.
- Identify, assess, and control the environmental aspects and risks that may arise from our yacht production activities,
- Prevent potential emergencies such as chemical spills and fires.
